

## LESSON PLAN

## DEPARTMENT: MATHEMATICS AND SCIENCE BHUBANANANDA ORISSA SCHOOL OF ENGINEERING, CUTTACK ACADEMIC SESSION:-2021-22

## SEMESTER: - 1<sup>ST</sup> SEM. WINTER-2021

SUBJECT: - ENGINEERING MATHEMATICS-I

| Discipline:<br>(All Branch)<br>CSE & IT  | Semester: 1 <sup>st</sup> Semester   | Name of the Teaching Faculty:<br>PRIYABRAT DAS   |
|--|--|--|
| Subject:<br>Engineering<br>Mathematics-I | No. of Days/<br>per week class allotted<br>(Mon, Tue, Wed, Thu, Fri,<br>Sat) | Semester From:         - Date:         25 / 10 / 2021 to         31/           01/2022         No of Weeks:         - 15 |
| Week                                     | Class days & Dates   | Theory Topics  |
| 1 <sup>st</sup>                          |  | 1) MATRICES AND DETERMINANTS   |
|  | 25.10.21   | a) Types of matrices   |
|  | 26.10.21   | b) Algebra of matrices   |
|  | 27.10.21   | c) Determinant   |
|  | 28.10.21   | d) Properties of determinant   |
|  | 29.10.21   | Problem of above   |
|  | 30.10.21   |  |
| 2nd                                      |  | 1) MATRICES AND DETERMINANTS   |
|  | 1.11.21  | e) Inverse of a matrix   |
|  | 2.11.21  | (second and third order)   |
|  | 3.11.21  | Problem on second order matrix only  |
|  | 5.11.21  |  |
|  | 6.11.21  |  |
| 3 <sup>rd</sup>                          |  | 1) MATRICES AND DETERMINANTS   |
|  | 8.11.21  | f) Cramer's Rule (Question should be on two variables)   |
|  | 9.11.21  |  |
|  | 10.11.21   | g) Solution of simultaneous equations by matrix inverse method (Question should be on two variables)                     |
|  | 11.11.21<br>12.11.21   | Problem of above   |
|  | 13.11.21   | CLASS TEST-1   |
| ath                                      |  | 2) TRIGONOMETRY  |
| 4 <sup>th</sup>                          |  | a) Trigonometric ratios  |
|  | 15.11.21<br>16.11.21<br>17.11.21   | b) Compound angles, multiple and sub-multiple angles (only formulae)   |
|  | 18.11.21<br>20.11.21   | Problem of above   |
| 5 <sup>th</sup>                          | 22.11.21   | 2) TRIGONOMETRY  |

|                 | <b></b>  |   |
|-----------------|----------|---|
|                 | 23.11.21 | c) Define inverse circular functions and its  |
|                 | 24.11.21 |   |
|                 | 25.11.21 | properties (no derivation)  |
|                 | 26.11.21 | Problem of above  |
|                 | 27.11.21 | CASSS TEST -2   |
| 6 <sup>th</sup> |          | 2) TRIGONOMETRY   |
|                 | 29.11.21 | c) Define inverse circular functions and its properties (no   |
|                 | 30.11.21 | derivation)   |
|                 | 1.12.21  |   |
|                 | 2.12.21  | Problem of above  |
|                 | 3.12.21  |   |
|                 | 4.12.21  |   |
| 7 <sup>th</sup> |          | 3) CO-ORDINATE GEOMETRY IN TWO DIMENSIONS   |
| -               |          | (Straight line)   |
|                 | 6.12.21  | a) Introduction of geometry in two dimension  |
|                 | 7.12.21  | b) Distance formulae, division formulae, area of a triangle (only   |
|                 | ,        | formulae no derivation)   |
|                 | 8.12.21  | c) Define slope of a line, angle between two lines (only F),  |
|                 | 0.12.21  | condition of perpendicularity and parallelism.  |
|                 | 9.12.21  | d) Different forms of straight lines (only formulae)  |
|                 | 5.12.21  | i) One point form   |
|                 |          | (ii) two point form   |
|                 |          | (ii) slope form   |
|                 |          | (iv) intercept form   |
|                 |          | (v) Perpendicular form  |
|                 | 10.12.21 | Problem of above  |
|                 |          |   |
| 8 <sup>th</sup> | 11.12.21 |   |
| 8               | 12 12 21 | 3) CO-ORDINATE GEOMETRY IN TWO DIMENSIONS   |
|                 | 13.12.21 | <ul> <li>e) Equation of a line passing through a point and (i) parallel to a<br/>line (ii) Perpendicular to a line</li> </ul> |
|                 |          |   |
|                 | 14.12.21 | f) Equation of a line passing through the intersection of two   |
|                 |          | lines   |
|                 | 15.21.21 |   |
|                 |          | g) Distance of a point from a line  |
|                 | 16.12.21 | Problem of above  |
|                 |          |   |
|                 | 17.12.21 |   |
|                 | 18.12.21 |   |
| 9 <sup>th</sup> |          | 4) CIRCLE   |
|                 | 20.12.21 | a) Equation of a circle   |
|                 | 21.12.21 |   |
|                 | 22.12.21 | (i) centre radius form  |
|                 | 23.12.21 |   |
|                 |          | (ii) general equation of a circle   |
|                 | 27.12.21 |   |
|                 |          |   |
|                 | 24.12.21 | (ii) general equation of a circle<br>Problem of above   |

| . eth            |                  |   |
|------------------|------------------|---|
| 10 <sup>th</sup> |                  | 4) CIRCLE   |
|                  | 27.12.21         | (iii) end point of diameter form  |
|                  |                  | Problem on circle   |
|                  | 28.12.21         | CLASS TEST-3  |
|                  | 2012121          | 5) CO-ORDINATE GEOMETRY IN THREE DIMENSIONS                             |
|                  |                  | a) Distance formulae,   |
|                  |                  |   |
|                  | 29.12.21         | section formulae, direction ratio, direction cosine,                    |
|                  | 30.12.21         | angle between two lines (condition of parallelism and perpendicularity) |
|                  | 1.01.22          | Problem of above  |
| 11 <sup>th</sup> |                  | 5) CO-ORDINATE GEOMETRY IN THREE DIMENSIONS                             |
|                  | 3.1.22           | b) Equation of a plane  |
|                  | 4.1.22           | i) General form   |
|                  | 5.1.22<br>6.1.22 |   |
|                  | 7.1.21           | angle between two planes  |
|                  | 8.1.21           | Problem of above  |
| 12 <sup>th</sup> |                  | 5) CO-ORDINATE GEOMETRY IN THREE DIMENSIONS                             |
|                  | 10.1.22          | perpendicular distance of a point from a plane equation of a            |
|                  | 11.1.22          | plane passing through a point and                                       |
|                  | 12.1.22          |   |
|                  | 13.1.22          | i) parallel to a plane  |
|                  | 14.1.22          | (ii) perpendicular to a plane   |
|                  |                  |   |
|                  |                  | Problem of above  |
|                  | 15.1.22          | QUIZ TEST   |
| 13 <sup>th</sup> |                  | 6) SPHERE   |
|                  |                  | a) Equation of a sphere   |
|                  | 17.1.22          | i) centre radius form   |
|                  | 18.1.22          | ii) general form  |
|                  | 19.1.21          | iii) two end points of a diameter form (only formulae and               |
|                  | 20.1.22          | problems  |
|                  | 21.1.22          |   |
|                  | 22.1.22          | Problem of above  |
| 14 <sup>th</sup> | 24.1.22          |   |
|                  | 25.1.22          | Revision  |
|                  | 26.1.22          | Exam related problem practice   |
|                  | 27.1.22          |   |
|                  | 28.1.22          |   |
|                  | 29.1.22          |   |
| 15 <sup>th</sup> | 31.1.22          | VST FOR SEMESTER EXAM   |
